

Service 2 : Finance & Performance Management

The Finance & Performance Management specialty works with clients to tackle issues of importance to the Chief Financial Officer, principally in creating value for the corporation and delivering world-class finance capabilities. The main focus areas are Finance Operations, primarily looking at back-office services, Corporate Finance, looking at finance capabilities, and Enterprise Performance Management, looking at key performance indicators for financial performance. You are likely to work across industries, focusing on strategy, operating model design and transformation initiatives
