

## Service 9 : Shared Services

**Bhilwara Consulting Group's** shared services team "has been there and done that"... and done it well. If you want to work with folks who have designed, supported, and run shared services organizations within today's modern organization, the Shared Services Salon is the place to shop!!

Our team not only knows first hand how to design a shared services organization, but they know how to manage the organizational changes that are necessary to take advantage of the shared services concept.
